Mr. President and Gentlemen of the Council:-

Tonight marks the start of a new administration of the municipal affairs of our City. Several of us were just recently honored by the electorate of Salisbury and I feel, as I am certain you do, the corresponding responsibility which that honor carries.

We new men, together with you gentlemen who are holdover members of the Council, make up the governing body of Salisbury for the ensuing twelve months.

The success of our administration, in my opinion, hinges upon our ability to cooperate one with the other in the official discharge of our duties. Without such a spirit the best interest of our people cannot be subserved.

Naturally, at times, we will differ on impending questions. Sometimes we may disagree strenuously among ourselves. These things are but natural and, if they did not come to pass, the people of Salisbury could reasonably think that their affairs were not being properly administered.

We will make, during the coming year, mistakes. President Roosevelt said, you recall, upon taking office last year, "I do not expect to bat 1,000 per cent". Certainly we cannot hope for that degree of perfection.

However I want to say to you that, knowing you men as I do, that when miscues are made by any of us they will be of the head and not of the heart.

From my standpoint I shall respect the judgment of each of you, give due credit to your arguments, and, when a matter is once settled, accept the verdict in a sportsmanlike manner and mark the incident closed.

I should also, at this time, like to pay my respects to our outgoing Mayor, Mr. Insley. He needs no better attest to the confidence and esteem in which he is held by the populace of Salisbury than the knowledge that he was thrice elected Chief Executive of this progressive little city.

He has given Salisbury a clean, conscientious administration and, as he retired from the Mayoralty, it is with the profound respect of our citizenry.

I appreciate, too, the unflinching courtesy which he has always accorded me and I shall feel free to call upon him for information and advice should the occasion arise.

There are several problems now facing us that I shall touch briefly upon now but take up more in detail at later meetings.

TRAFFIC SITUATION:— We all realize, city officials, business men, and private citizens, that a perplexing situation confronts us in regard to the movement of vehicular traffic in our commercial or downtown section.

In recent months the flagrant disregard for existing ordinances has grown by leaps and bounds until today it has created a situation which is appalling.

By reason of double-parking, parking in restricted areas, overtime parking, and other violations, normal business intercourse is slowed up, a dangerous fire hazard is created, life and limb are imperiled, and traffic tie-ups frequently, particularly at certain hours, occur to bar the free and easy passage through our streets.

It is a situation which I believe can be vastly improved through the close cooperation of the Mayor and Council, the Traffic Commission, the business interests of the City, the police force,

and the Traffic Court.

I shall ask, shortly, that the Traffic Commission undertake a comprehensive survey of the situation and report its recommendations to the Mayor and Council.

PROPOSED SALISBURY "CUT-OFF"- This City was promised, nearly a year ago, that a through highway from the southerly limits to the northerly part of Salisbury would be built by the State, with the aid of PWA funds, in the then very near future. . . Salisbury is, I understand, the only municipality in Maryland through which the State Roads Commission does not maintain a through highway.

There is no greater task to which this administration can dedicate its efforts, I feel, than getting behind this proposition with full force in an endeavor to have it pushed to an early reality.

Certainly such a highway, which it is estimated would cost somewhere around a half million dollars, would be a tremendous boon to this section, economically, as well as go a long ways toward helping to solve our traffic problems by relieving the downtown streets of a big traffic load, by making certain residential streets far more desirable, and in protecting human life, particularly of school children.

POLICE FORCE:- I am submitting a little later, for your consideration, certain changes in the personnel of the Police Force. In so doing I am making a move which I deem, after mature deliberation, in the best interest of the general welfare of the City. Our police force, of financial necessity, has always been a small one and, as the city has grown, these men have been called upon to perform greater and more varied services.

These officers, called upon as they are to protect life and property day and night, to direct traffic, to aid pedestrians, to be tactful and supply necessary information to

visitors, must of necessity be men physically able to stand the grind for long hours and be ever alert.

In my appointmentⁿ I shall submit to you the names of two men who, through previous experiences of a year or more I believe, and my judgment is borne out by those in a position to know better, ably answer the above qualifications.

The two men, whose names I have omitted, have served the City for long periods and have reached ages or physical conditions where they cannot reasonably be expected to perform the many rigorous duties of patrolmen.

We have no pension system. In that connection I want to say that I think thought should be given to the establishment of such when financial conditions grow better.

I am not unmindful of the long service given by the two men in question and I am exerting every effort to find places for them in other departments of the city government for which they are now better fitted.

FIRE DEPARTMENT:- My remarks in this connection shall be brief.

My opinion, frequently expressed before, is that no city the size of Salisbury can boast of a more loyal and efficient volunteer fire department and I shall cooperate in every way at my command with our two companies.

TAX COLLECTION:- I feel that a study should be made of the present system of tax collection and to the installation, at some future time, of a modern system of tax billing and records.

The general delinquency in the payment of taxes, assessments for public improvements, and water rents, has created quite a concern in my mind. It appears to be our duty that this situation be thoroughly investigated and ways and means developed of rectifying this situation so that the City can carry out needed improvements and meet its current obligations.

If it is not now being done I would recommend that a monthly statement be submitted to the Mayor and Council showing the amount of tax delinquencies by years and water rents by quarters.

PUBLIC HEALTH:- The program initiated by the Federal Government, under CWA, for the drainage of stagnant water courses, I believe, should be recommended continued as a part of our relief program, thereby improving the mosquito control.

There is an ordinance requiring property owners to furnish closed metal containers for garbage receptacles and I think that this regulation should be respected.

At this particular time of the year a program should be initiated to clean up the vacant lots, thereby improving the general health and appearance of our community.

There are other matters I have in mind but these can be taken up from time to time as the occasion demands.

I am now ready to submit to you my list of appointments for the coming year, for your consideration.

Salisbury, Md. May 21, 1934

Gentlemen of the Council:-

I submit herewith my list of appointments for the offices to be filled (under provisions of the City Charter) for the consideration of your honorable body:

Judge of the Peoples Court, S. King White.

Dear Mr. Jones:

I have been informed by Mr. F.H. Dryden, State Engineer, that limited Federal funds will be available for carrying out worthy projects, particularly in connection with the building of airports.

In order to request assistance from the Federal Government in connection with the construction on an airport, it is necessary for us to ascertain from local political subdivisions and organizations what contributions will be appropriated to help with this work.

If you are interested in the building of an airport near Salisbury, I respectfully request that you place this matter before the City Council at an early date and inform us what contribution the Council will be willing to make for the building and maintenance of a local airport.

Respectfully yours,

You will recall that the writer, in company with Mr Clarke Gardner, Acting City Engineer, appeared before your body some weeks ago in connection with a drainage proposition which exists in the vicinity of Davis and East William Streets, in which the Mayor and Council felt that the County and the City had a joint responsibility.

We were told that you would take the matter under advisement but to date we have heard nothing from you in the connection.

The Council last night authorized me to again call this matter to your attention and asked that we be given answer so that the City may then be in a position to take whatever action it deems necessary in the matter.

Yours very truly,
